

# DANGEROUS LOWS

! 18" Frame

! 4" diameter voice coil

! 70lb motor

## ! **DD AUDIO** | 9900 SERIES

The new **9900 Series** is one of the most destructive sub-woofer line ups the world has ever seen. These subs will give the serious bass-head the **extreme** long-term power handling needed to demolish their earthly surroundings with its ultra low frequencies. The **9900 Series** is designed with the same ground breaking innovations and demanding performance standards you've come to expect from DD Audio. With a 4" diameter voice coil dropped into a 70lb motor and topped off with up to a 21" frame, it's a true BEAST of a sub.

If you need a woofer that will play louder and longer than any other woofer on the planet, then you need the **BEAST**. Ask for the DD Audio 9900 Series at your local car audio shop or find a select dealer near you at [ddaudio.com/dealers](http://ddaudio.com/dealers).
