## LOUD!

Loud, modern, striking! Mac Audio is: „THE NEW LOUD“! We combine the latest technologies and most modern trends with our many years of experience and competence. The result: Most modern, innovative components with maximum flexibility, reliability and stylish looks! Above all: Strong, spectacular power sound up to the highest levels – no matter how long the party lasts! We guarantee this by monitoring the quality of all our products right down to the smallest detail. Providing an unrivalled price-performance ratio is part of our philosophy and standard.

## STRIKING!

Restraint is not our forte. Mac Audio products are striking! Through stylish, modern looks and above all: though uncompromisingly powerful, authentic sound! Added to this are the factors of flexibility and convenience. Our audio systems offer wireless music streaming as well as conventional radio reception and CD playback. Always with identically high performance.

## RELIABLE!

The high standards of our quality control speak for themselves! Only high-quality components that withstand the tough test procedures applied by the Mac Audio engineers leave our production plants. If problems do occur, however, our experienced service team is always there, ready to help.

# TT 100 BK E

## TURNTABLE WITH BLUETOOTH® AND LED-LIGHT SHOW

High-quality vinyl playback combined with Bluetooth® streaming and a stylish LED light show: The TT 100 BK E unites vintage hi-fi with modern demands and offers maximum flexibility. The music is transmitted wirelessly via Bluetooth output from the record to every compatible input source – stereo system, loudspeaker or headphone. A direct connection to devices without a phono input or Bluetooth is also easily possible thanks to the integrated phono pre-amplifier. It goes without saying that the volume is adjustable for both Bluetooth and the headphone output. The hi-fi virtues of the TT 100 BK E stand out with the anti-resonance silicone turntable top, including the quiet belt drive and decoupled DC motor, the elaborate pick-up arm with the soft lift function and the piezo crystal pick-up system with the replaceable needle. LEDs and ten different light-show settings are integrated to provide the right visual background.

# SOUNDFORCE

## SUPPORTS EXTREMELY HIGH LOADS. EXTREMELY LOUD.

The speakers in the Mac Audio Soundforce series are more than pure party speakers! In three different sizes, Mac Audio delivers a well thought-out, semi-professional sound system concept for users with extremely high demands in terms of capacity and acoustic pressure. With a typical PA look, the components are also extremely tough and offer a high degree of flexibility thanks to integrated carrying handles and sturdy protection profiles.
